Software Processes (SPS611S) Course Outline

STATEMENT ABOUT ACADEMIC HONESTY AND INTEGRITY

All staff and students of the Namibia University of Science and Technology (NUST), upon signing their employment contracts and registration forms, commit themselves to abide by the policies and rules of the institution. The core activity of NUST is learning and in this respect academic honesty and integrity is very important to ensure that learning is valid, reliable and credible.

NUST therefore does not condone any form of academic dishonesty, including plagiarism and cheating on tests and assessments, amongst other such practices. NUST requires students to always do their own assignments and to produce their own academic work, unless given a group assignment.

Academic Dishonesty includes, but is not limited to:

- Using the ideas, words, works or inventions of someone else as if it is your own work.
- Using the direct words of someone else without quotation marks, even if it is referenced.
- Copying from writings (books, articles, webpages, other students' assignments, etc.), published or unpublished, without referencing.
- Syndication of a piece of work, all or part of an assignment, by a group of students, unless the assignment was a legitimate group assignment.
- The borrowing and use of another person's assignment, with or without their knowledge or permission.
- Infringing copyright, including documents copied or cut and pasted from the internet.
- Asking someone else to prepare an assignment for you or to write or sit an assessment for you, whether this is against payment or not.
- Re-submitting work done already for another course or programme as new work, so-called self-plagiarism.
- Bringing notes into an examination or test venue, regardless of whether the notes were used to copy or not.
- Receiving any outside assistance in any form or shape during an examination or test.

All forms of academic dishonesty are viewed as misconduct under NUST Student Rules and Regulations. Students who make themselves guilty of academic dishonesty will be brought before a Disciplinary Committee and may be suspended from studying for a certain time or may be expelled. All students who are found guilty of academic dishonesty shall have an appropriate endorsement on their academic record, which will never be erased.

COURSE INFORMATION

Course code and Title:	*SPS611S*, Software Processes
Department:	Software Engineering
Programme:	07BACS, Bachelor of Computer Science
National hours:	120 hours (Contact: 45 hours; Directed Self-learning and Self-directed Learning: 60 hours; Assessment: 15 hours)
NQF level and credit:	NQF Level 6, 12 Credits
Pre-requisites:	None
Course Equivalencies:	None
Course aim:	This course aims to provide students with appropriate and effective structures for software engineering practices and processes. This will help students to analyse and specify software requirements; look at different "contexts" of technology development or adoption strategies, deployment, and maintenance of software components and systems at the individual, team, and organizational levels.
Course Delivery Method:	The course will be facilitated through face-to-face lectures, classroom presentations, classroom and online discussions, case studies, theory and practical demonstrations, self- guided learning, student presentations, assignments and exercises.
Course Format:	45 hours of face –to-face or online contact with the lecturer 40 hours directed self-learning and Self-Directed learning: 15 Hours Supervised tutorial: 20 hours of assessment
Effective Date:	9 February 2026

13 Jackson Kaujeua Street
Private Bag 13388
Windhoek

Course Resources:

There are several facilities that students can use as a course resource at NUST and home.

a) **NUST Level:** The main library, Department of Student Services, Writing centre and student academic problems - Teaching & Learning Unit (TLU), Campus Health and Wellness Centre (CHWC) - NUST Clinic.

b) **Faculty Level:** Faculty-based induction, learning support units, and tutor systems, computer laboratories. Lecturers are available for consultation and the hours are shown on their doors. Emails can be sent to the lecturers as well.

c) **Course Level:** Course Outline; Electronic learning resources, Microsoft Teams, E-learning materials will be developed. Make use of the MyNUST eLearning platform as the learning management application.

Quality Assurance:

Assessment moderation will be conducted in accordance with NUST's general rules and guidelines.

Student Support and Learning Resources:

Institutional support is provided through the NUST Library, the office of the Dean of Students, and the Student Representative Council. School support is provided through new-student orientation activities and the IT student representatives. Departmental and course-based support is provided through supervised practicals, customised course material, and through interactions with lecturers, the Head of Department, and the Deputy Head of Department.

Lecturer Information

Lecturer name: Ms Josephina Muntuumo & Ms Rosetha Kays (Course Coordinator, Theory/Practical Lecturer)

Email: jmuntuumo@nust.na & rkays@nust.na

Office phone: +264 61 207 2167 & +264 61 207 240

Office location: FCI House & Poly-heights, 4th Floor, Room 4

Office hours: 07H30 AM – 16H30 PM

Consultation hours: By appointment via e-mail. Course Coordinator office hours will be posted on E-Learning and on their office doors. When many students are waiting to ask questions, a 10-minute time limit per student will be used. Students should come to office hours with clear and well-organised questions to avoid wasting time.

Student Readiness

Technology & Equipment Readiness:
This course will only utilise already existing NUST equipment.

Student Commitments and Contact Times:

a) **Class Attendance:** Attend all classes, be on time, and make appropriate notes. If a student misses a class, it is their responsibility to catch up on what was covered. The students have access to the recommended books from the library. If any special presentations are used in class, they will be made available and do not need to be copied by the student.

b) **Self-Directed Study:** After every class, and before the start of the next class, sort, complete, and annotate own lecture notes, and select further reading in case any item was not understood on the first attempt. A student must spend their notational hours revising, practising and/or completing homework for the course. A student should take the reading list (prescribed and recommended reading seriously. Read all prescribed material to the extent that the student could write a one-page essay, summarising the content, without looking at the material again.

c) **Communications:** Maintain active communication with your group lecturer. Students are expected to use established channels of communication and platforms to solve course-related issues on time. The end of the semester is not the best time to fix issues. Use the available time to deal with matters at hand.

Prescribed Reading:

Kneuper, R. (2018). Software processes and life cycle models: An introduction to modelling, using and managing Agile, Plan-Driven, and hybrid processes. Springer.

Recommended Reading:

Kuhrmann, M., Münch, J., Richardson, I., Rausch, A., & Zhang, H. (Eds.). (2016). Managing software process evolution: traditional, agile and beyond-how to handle process change. Springer.

Lauesen, S. (2002). Software requirements: Styles and techniques. Pearson Education

Student Learning
Specific Learning Outcomes:

Upon completion of the course, students will, through assessment activities and show evidence of their ability to:

1. Discuss the importance of software requirements engineering for successful implementation.
2. Evaluate different adoption strategies of technologies.
3. Evaluate different requirement elicitation techniques and software engineering process infrastructure.
4. Evaluate and implement the appropriate software process for the given context.
5. Conduct quality analysis and control to improve processes and practices.

Comprehensive Learning Outcome:

Apply software requirement analysis and specification concepts and techniques to elicit, validate, and document requirements that are valid for system design projects.

Course Schedule: The table below summarises the course schedule for sessions. Note that the dates scheduled below are subject to change at the lecturer's discretion based on students' needs. Students will be informed of any change ahead of time:

Table 1: Topic Details

Week #	Date	Topic	Activities
1	09 – 13 Feb	Course Overview What is a "software process"	In-class practical activity
2	16– 20 Feb	Process implementation Evolution processes and activities.	
3	02 - 06 Mar	Software Development Life Cycle, Requirements elicitation, analysis, specification & documentation.	In-class practical activity
4	09– 13 Mar	Traceability and validation of requirements	In-class practical activity
5	16 – 20 Mar	Quality measures of software requirements	In-class practical activity
6	23– 27 Mar	Software development processes in organisations .	Industry Guest Speaker
		Mid Semester Break (30 Mar -02 Apr)	
7	07-10 April	Software development processes in organisations Agile, DevOps,CI/CD))	In class activity
8	13-17 April	Software Configuration Management System	**Theory Test week**
9	20-24 April	Distribution and backup	Industry Guest Speaker
10	27 Apr – 01 May (01 May Public Holiday)	Software development within open-source communities (Reading case studies)	Group assignment Due and Assignment Presentation starts
11	04 – 08 May (04 May Public Holiday)	AI in Software Engineering & Process Automation	Assignment Presentation ends
12	11-15 May	**Marks due**

Important Dates

NOTE: The dates are subject to change at the lecturer's discretion based on students' needs. Students will be notified in advance of any changes.

Due Dates	Time	Assessment	Venue
	Practical Class time	In-class practical activity	Practical Class time slot
17 April	18:00	Theory test	FCI labs
01-08 May	Practical Class time slot	Group Assignment Presentation	Online E-Learning Submission through TurnItIn, Hard Copy to the lecturer – presentations online or f2f
11 May	17H30	Supplementary	TBA

Assessment and Evaluation

The course will be assessed using a combination of Continuous Assessment and an end-of-semester examination. The continuous assessment includes one In-class practical activity, one test and one group project. As per NUST's rules, a supplementary assessment will be conducted if needed. The assessment will be a test. The minimum pass requirement for this course is 50%. The final course mark allocation comes as follows:

Mark #	Assessment	Weight
1	In-class practical activity	20%
2	Test	40%
3	Group Assignment	40%
	Total:	**100%**

Students must obtain at least 40% to write the examination, while a minimum of 40% is required in the examination. The semester mark and examination mark shall be used to determine the final mark in the ratio of 40% (semester mark) to 60% (examination mark). A minimum final mark of 50% is required to pass the course.

Supplementary Assessments:

It is the lecturer's discretion to determine the supplementary assessment, in accordance with the assessment guidelines.

13 Jackson Kaujeua Street
Private Bag 13388
Windhoek
NAMIBIA
T: +264 61 207 2052
F: +264 61 207 9052
E: dse@nust.na
W: www.nust.na

Supplementary Policies

Late submissions will not be accepted after the due date and time and will thus be marked as 0%. Moreover, students who missed an evaluation for genuine reasons supported by relevant documentation (e.g., illness) may seek a supplementary test. The latter shall not be requested to replace a failed project.

Plagiarism and Deduction of Marks:

It is the student's responsibility to be familiar with and adhere to the NUST's Policies. These Policies can be found in the NUST Prospectus or online at:
https://www.nust.na/sites/default/files/documents/eYearbook_P4_ComputingandInformatics.pdf

Marks will be deducted if students do not adhere to the University's rules, as per Rule AC3.2. All **assignments should be submitted through Turnitin**, the similarity-checking software integrated into the eLearning/MOODLE Learning Management System. If plagiarism is detected, marks should be deducted as follows:

% Similarity Detected	% Marks Deduction
0 – 20	0
20 – 40	10
40 – 60	25
60 – 100	100

Please note that the percentage % shown above is an average % for all Faculties and should be used as a Guideline.

Assessment Submission:

All assessments (assignments, projects, and activities) should be submitted on the eLearning platform and run through **Turnitin** to check for similarity.

Assessments should be typed and submitted in **MS Word or PDF format**. Please note that students should not submit assignments as JPGs or any other image format, as **Turnitin** cannot read images.

COURSE POLICIES

General Academic Policies: It is the student's responsibility to be familiar with and adhere to NUST's Policies. These Policies can be found in NUST Prospectus or online at www.nust.na/prospectus.

Failure to Pay Fees:

A student who fails to pay his/her fees may not be allowed to sit the examination and if allowed, the results will be withheld until all outstanding fees are paid in full.

Important Student Services at NUST

There are a variety of services that you can use at NUST. These services are to your advantage – Use them!!! They include the following:

- Student Counseling and Career Development - Dean of Students Office.
- The Writing Centre and student academic problems – Centre for Teaching & Learning (CTL)
- Campus Health and Wellness Centre (CHWC) - Dean of Student's office/ NUST Clinic
